

Empathy Map

AI-Assisted Smart Budget Planner

Target User Empathy Map

Says	Thinks	Does	Feels
"I need to stay within my budget." "Show me what I can afford."	"Will the total exceed my budget?" "Which items should I prioritize?"	Enters preferences, generates a plan, reviews totals, opens search links, and checks history.	Concerned about overspending; relieved when the plan clearly shows total and remaining budget.

Pain Points

- Manual budgeting across multiple categories.
- Difficulty comparing quantities and costs.
- Need for quick, understandable recommendations.
- Need to preserve a strict spending limit.

Desired Gains

- Itemized plans.
- Visible remaining budget.
- Search links for follow-up shopping.
- Optional AI explanation for style/tradeoff context.
