

Sample Project Documentation

AI-Assisted Smart Budget Planner

Project Documentation Summary

PocketSmart AI is a runnable FastAPI web application offering Home, Party and Jewelry budget planners. Users can register/login, generate plans, save plan history, optionally upload a Jewelry outfit image, and receive optional Gemini commentary.

Sample Home Request

```
{"budget":15000,"room":"Living room","style":"Modern minimalist","lights":6,"fans":2,"tables":1}
```

Documented Home Result: estimated total ₹9,600; remaining ₹5,400.

Sample Party Request

```
{"budget":30000,"guests":40,"event_type":"Birthday","venue":"External","city":"Chennai"}
```

Documented Party Result: estimated total ₹16,800; remaining ₹13,200.

Sample Jewelry Request

budget=8000; occasion=Wedding; style=Traditional; outfit_color=Maroon; optional JPEG/PNG/WebP image ≤3 MB.

Documented Jewelry Result: estimated total ₹3,450; remaining ₹4,550.

Scope Note

Prices are sample INR estimates. The project does not fetch, scrape, or verify live merchant prices; it generates outgoing search links.
