

Problem-Solution Fit

AI-Assisted Smart Budget Planner

Canvas Area	PocketSmart AI
Customer Segment(s)	Individuals planning home purchases, parties/events, or jewelry within a fixed budget.
Problems / Pains	Manual cost estimation; many categories; risk of overspending; difficulty matching style/preferences to a budget.
Triggers to Act	Upcoming home setup, birthday/wedding/corporate event, or jewelry purchase.
Emotions Before / After	Before: uncertainty about allocation. After: clearer itemized plan and remaining budget.
Available Solutions — Pros / Cons	Manual spreadsheets/search: flexible but time-consuming. Generic shopping sites: product-focused but not budget-plan focused.
Customer Limitations	Fixed budget, limited time, varying preferences, need for simple web access.
Behavior / Intensity	User enters a budget and preferences, generates a plan, reviews totals and may follow search links.
Channels of Behavior	Online web application; external merchant search links.
Problem Root / Cause	Budget, quantity and preference decisions are distributed across multiple categories and services.
Your Solution	PocketSmart AI combines deterministic budget allocation, itemized plans, history and optional Gemini commentary in one FastAPI application.
